

Ultrasonic ND/PCD Die Working Equipment

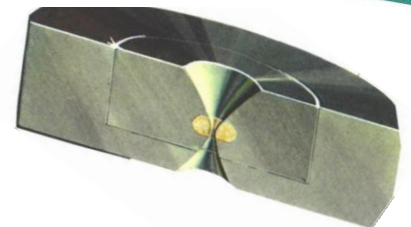

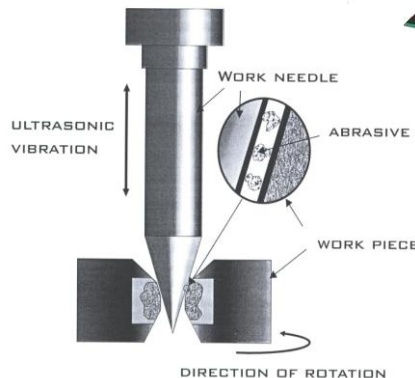

for the conical die-geometry
(grinding + polishing)

USP-115

Semi-automatic **Ultrasonic Die Processing Machine** with outstanding efficiency and easy to perform operation. Available in three versions for all Ø-ranges.

Workrange:

- USP-115/UF:** 0,05 - 3,0 mm Ø
- USP-115/F:** 0,10 - 8,0 mm Ø
- USP-115/P:** 0,30 - 20,0 mm Ø

USP-TWIN

First ever Ultrasonic Machine for ND +PCD Dies with two (!) workstations :

Compensating increasingly less available human expert skills in die tool processing, same time **offering up to double potential.**

This advanced EDER-conception, **can be controlled by one single operator only** and can handle both small and medium to large die bore sizes simultaneously. Therefore model **USP-TWIN** is setting new standards for die processing and die repairing workshops now.
